📍 Berlin, Germany

I am a Multi-Tasking, result-oriented engineer with a keen eye on quality. I have rich experience in developing and consulting for DevOps processes since the past 7 years in many enterprises. I am known to showcase rich cloud architecting and development experience with enterprise customers on their cloud adoption and acceleration journeys. I like developing and designing fault-tolerant, high-performing and resilient applications and platforms that scale with trending business requirements. I am a fan of automation and like to develop event based operation tools that provide deep insights for production workloads on AWS.

WORK EXPERIENCES

Staff Systems Engineer II
Delivery Hero, Berlin | December, 2021 - Present
